Summary

I have worked as a full-stack developer since 2016, a period during which I have worked in different environments, from start-ups to international companies. I am a self-motivated and self-taught professional who likes to solve problems. I merge a passion for usability and user experience with technical knowledge to create cool digital experiences. My repertoire includes programming languages and tools such as ReactJS, Vue, NodeJS, Python, MySQL, PostgreSQL, Nginx, MongoDB, Redis, and Elasticsearch. I also deploy applications using cloud computing like AWS EC2, ECS, S3, Azure, Heroku, and Github, and configure CICD on Gitlab and Github.

Experience

Full Stack Javascript Developer

VISEO ASIA

Feb 2021 - Present (2 years 2 months)

- * Creates applications based on the user requirements and functionalities of client
- * Create website on Shopify
